

HOW

SURFACE-FIRST™ WATER INTELLIGENCE

SUPPORTS

WASTEWATER OPERATIONS

Continuous surface contaminant monitoring helps wastewater operators:

Detect hydrocarbons & organics earlier

Earlier awareness of changing wastewater surface conditions

Identify abnormal influent conditions sooner

Earlier visibility into changing influent characteristics

Support treatment process optimization

Respond earlier to changing wastewater conditions

Support consistent effluent quality

Earlier awareness helps operators maintain stable treatment performance

Enable earlier operational response

More time to respond before conditions impact operations

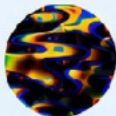

Dramatically reduce sensor maintenance

Non-contact. No biofouling.
Lower total cost of ownership.

Earlier awareness of contaminants through surface detection

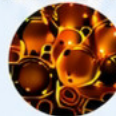

HYDROCARBONS

Oil & fuel sheens • spills • leaks

HABs

Algal activity • harmful algal blooms

ORGANICS

CDOM / fDOM • dissolved organics
